REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or fairly suggest a surface acoustic wave arrangement comprising each of the specifically recited features, and especially having a transducer with "one of the absolute finger center distances and a combination of the absolute finger center distances and finger widths decreasing in the transverse direction" (see claim 1, lines 3-6), and also having "means dividing the acoustic path" (claim 1, lines 6-7) such that the radiation of the acoustic wave in the center track is selected from "a radiation in a direction opposite the predominant direction and a radiation with an opposite phase" (see claim 1, the last two lines thereof).

Prior art references found and cited by the Examiner are discussed below.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yatsuda et al. U.S. 4,878,036 appears to accomplish something similar to the invention by canceling a frequency within the pass band (see Figs. 4 and 5) by placing a scattering reflector 42 in the track associated with the frequency to be removed.

Jian et al. U.S. 6,856,214 discloses a surface acoustic wave (SAW) arrangement with tapered transducers and having phase shifts between adjacent tracks (see Fig. 6).

Komatsu et al. U.S. 4,028,649 discloses a SAW arrangement with a transducer 3 (Fig. 3) that has a structure similar to Applicant's Fig. 4A, but it is not tapered.

Shreve U.S. 4,081,769 discloses SAW transducers with phase reversals between tracks (see Figs. 1, 5 and 6).
